

Comprehensive Payment Reform - Example Practice Transitioning to Value-Based Care.

This graph with horizontal bars gives an example of how much money an example primary care practice can make under OneCare's value-based care model.

The x-axis shows the type of models available to primary care practices. The top bar is labeled "Non-OneCare" practices, then follows the bars below representing practices: "OneCare Conventional Model without Shared Savings Available to all Primary Care", "OneCare Conventional Model with Shared Savings Available to all Primary Care", "OneCare Comprehensive Payment Reform (CRP) Model without Shared Savings Available only to Independent Primary Care", and "OneCare CPR Model with Shared Savings Available only to Independent Practices". These represent the continuum of fee-for-service to value-based care. The y-axis represents dollars paid to the practice, scaled \$15-\$40 in increments of \$5. At the end of each bar the additional percentage above the Non-OneCare amount is shown.

Each bar shows the breakdown of payment to primary care. The bars are broken out to show Average Base Fee-For-Service Per Member Per Month (Based on Payer Rate Estimates) in gray, Base Primary Care Investment in green, Shared Savings Opportunity in yellow, Care Coordination Opportunity in teal, Value Based Incentive Fund opportunity in purple, and CPR Program Supplement in dark green. All of the models receive the \$25 via the Average Base Fee-For-Service Per Member Per Month. Non-OneCare practices only receive the Average Base Fee-For-Service Per Member Per Month. All of the models other than the Non-OneCare practices can be paid via Base Primary Care Investment, Care Coordination Opportunity, and Value Based Incentive Fund opportunity. OneCare's Conventional Model with Shared Savings and OneCare CPR Model with Shared Savings can both receive the Shared Savings Opportunity. OneCare Comprehensive Payment Reform Model without Shared Savings and OneCare CPR Model with Shared Savings can both receive the CPR Program Supplement.

The amount of money paid to each practice steadily increases as you move down the graph toward more value-based care models. Non-OneCare Models are paid the least amount of money and OneCare CPR Model with Shared Savings are paid the most money. The full table representing this bar graph can be found below.

	Non-OneCare	OneCare Convention Model without Savings (Available to all Primary Care)	OneCare Conventional Model with Shared Savings (Available to all Primary Care)	OneCare Comprehensive Payment Reform (CPR) Model (Available only to Independent Primary Care)	OneCare CPR Model with Shared Savings (Available only to Independent Primary Care)
Average Base FFS	\$25.00	\$25.00	\$25.00	\$25.00	\$25.00
Base Primary Care Investment	\$0.00	\$1.75	\$1.75	\$1.75	\$1.75
Shared Savings Opportunity	\$0.00	\$0.00	\$3.00	\$0.00	\$3.00
Care Coordination Opportunity	\$0.00	\$2.00	\$2.00	\$2.00	\$2.00
Value Based Incentive Fund Opportunity	\$0.00	\$0.41	\$0.41	\$0.41	\$0.41
CPR Program Supplement	\$0.00	\$0.00	\$0.00	\$5.00	\$5.00
Total	\$25.00	\$29.16	\$32.16	\$34.16	\$37.16
Percentage Additional From Non-OneCare	0.00%	17.00%	29.00%	37.00%	49.00%
