

## **The Year-To-Date Patient Prioritization and Support from OneCare**

This infographic highlights the support that OneCare provides to providers by supplying care coordinators. It is split into two rectangular sections to first show the number of education opportunities for care coordination and the number of organizations that use the care coordination tools.

The first box on the left shows that 11 care coordinator education courses were attended by 311 individuals this year-to-date (2021). The second box on the right shows that in the last month 57 organizations were provided with the care coordination prioritization tools for facilitating outreach to Vermonters. 22.81% of organizations used this tool to provide outreach to Vermonters who frequently use the emergency department. 14.04% of organizations used this tool to provide outreach to Vermonters that have high inpatient hospital usage. 17.54% of organizations used this tool to provide outreach to Vermonters who have high medical, mental health, or social needs.
