

About OneCare Vermont

Who We Are

OneCare is an Accountable Care Organization (ACO), owned and operated in Vermont to serve Vermonters.

ACOs, like OneCare, represent a cooperative effort of providers who have pooled their resources and expertise to deliver care that is better coordinated, yielding better health outcomes and greater satisfaction.

OneCare does not deliver care, but provides resources and support to the providers that care for patients. OneCare partners with your local health care providers, and provides core supports for them as they change the way they deliver care and accept increasing accountability for the cost and quality of care.

OneCare supports providers through three key core capabilities: **network performance management, data and analytics, and payment reform.**

Mission, Vision, and Values

Mission:

OneCare partners with local health care providers to transform Vermont's health care system to one that focuses on health goals by providing actionable data and innovative payments that foster better outcomes for all.

Vision:

A trusted, equitable health care system where patients and providers work together to achieve optimal health and an exceptional care experience for all.

Values:

Collaboration: We actively build a culture of partnership & teamwork.

Excellence: We passionately pursue excellence using data-driven results and a quality focus.

Innovation: We lead through innovation, use courage to challenge existing systems, and act as a catalyst for reform.

Equity: We seek out and attend to health disparities so that everyone can attain their full health potential.

Communication: We share information and ideas directly and clearly.

Integrity: We are honest, ethical, and transparent in all that we do.

Core Capabilities

OneCare performs certain functions where scale economies are important or where a common approach is necessary to serve all participating providers. OneCare exists to facilitate improved provider network performance on cost and quality. The most critical functions OneCare provides are:

Core Capability #1: Network Performance Management

OneCare partners with thousands of local health care providers to break down silos in care. Working more like a system enables better coordination and communication among various members of your care team. Effective care coordination is a cornerstone of lowering unnecessary health care costs, improving outcomes, patient experience, and caregiver experience.

Core Capability #2: Data and Analytics

OneCare provides health care providers with data, funding and best practices across the state so that our family, friends, and fellow Vermonters, no matter where they live, get better care. Sharing comprehensive health information, regardless of where you receive care, will help all members to provide better and more consistent care.

Core Capability #3: Payment Reform

OneCare works with insurers and providers to change how health care services are paid. Under this model, providers get regular fixed predictable payments for each person instead of getting paid for each test or service they perform, and are rewarded based on quality outcomes. This allows health care providers the freedom to focus on what their patients may need.
